Business Card Specifications & Guidelines

Sizes

Australian business cards are commonly **55x90mm**, however there is no standard and no rules, so your size can be anything you like. For pricing purposes it must be smaller than 60 x 100mm (including bleeds)

Layout

Bleeds and critical exclusion zones are important to allow for proper guillotine tolerances of +/- 0.5mm

Use 3mm bleed and 3mm exclusion zone. Bleed area defines the extra image area outside the card border which is cut off during guillotining.

Exclusion zone defines the area inside the borders within which all important information should be restricted.

Paper Stocks

Our standard card stock is 350gsm coated silk matt. Other stocks are available by request, please call for advice.

Round cornering

We have two radius options 5mm and 10mm. When ordering please specify your preference and which corners are to be rounded (we can round any or all of them)

Turnaround

Our normal card service is generally **same day** from receipt of art files, Celloglazing will add a further 24 hours.

Artwork files

We can accept art files in any digital format. Please do not step-up (ie: replicate multiple copies to a page) instead supply just one copy of each card required.

For multiple versions, supply one document with multiple pages - for double sided cards every second page should be the card back.

Design & Artwork

Design & Artwork is available as separate service not included in the printing price.

Please call for an estimate, or email with as much information as possible to allow us to estimate costs with reasonable accuracy.
